When I tried to log in as Joe. A warning appeared.

I'm sorry Joe's password is super secure. You're not getting in that way.

But according to the hint, anyone's password isn't checked except for Joe's. So I inputted random stuff in username and password input field.

The only thing we got is here though.

Success: You logged in! Not sure you'll be able to see the flag though.

No flag for you

So I opened Burp Suite and intercepted the login process.
When I was intercepting the login process. I see interesting thing in the process.

In the cookie field, there's a variable called "Admin" and it's false.

```
1 GET /flag HTTP/1.1
2 Host: jupiter.challenges.picoctf.org
3 Cookie: cf_clearance=

  Firefox/125.0
```

So I edited it into "True"

And there u go.
