

PicoCTF - Local Authority Writeup

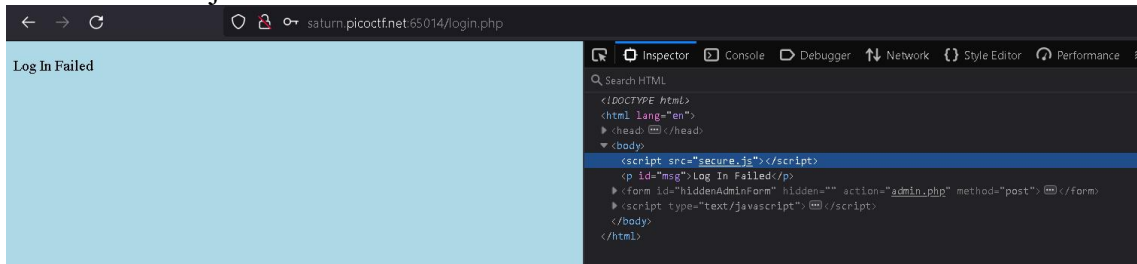

I'll make this very quick

Open the website in a browser

Input random things in the input field

Inspect the page

See the “secure.js”

You'll see the username and password needed

```
function checkPassword(username, password)
{
  if( username === 'admin' && password === 'strongPassword098765' )
  {
    return true;
  }
  else
  {
    return false;
  }
}
```

Log in again using that credential and you'll get the flag.
